

Logan and Gold Coast Faster Rail

Holmview station

Concept only. Subject to change.

The Logan and Gold Coast Faster Rail project will double the number of tracks between Kuraby and Beenleigh and connect growing communities with more frequent and reliable train services.

Overview

November 2023

Holmview station is being upgraded to improve accessibility, safety and customer experience. The new station will feature a range of improvements to make travel easier, including straightened and raised platforms, increased platform coverage, new lifts and improved park 'n' ride facilities.

As part of this project, the level crossings at Holmview Road and Spanns Road, Beenleigh will be closed to improve safety and reduce traffic congestion. Active transport connections across the rail corridor, at Holmview Road and Spanns Road, will be further investigated as part of design refinement activities in this area.

This station upgrade will be designed and constructed in compliance with the *Disability Discrimination Act (1992)* to provide and improve accessibility for all users.

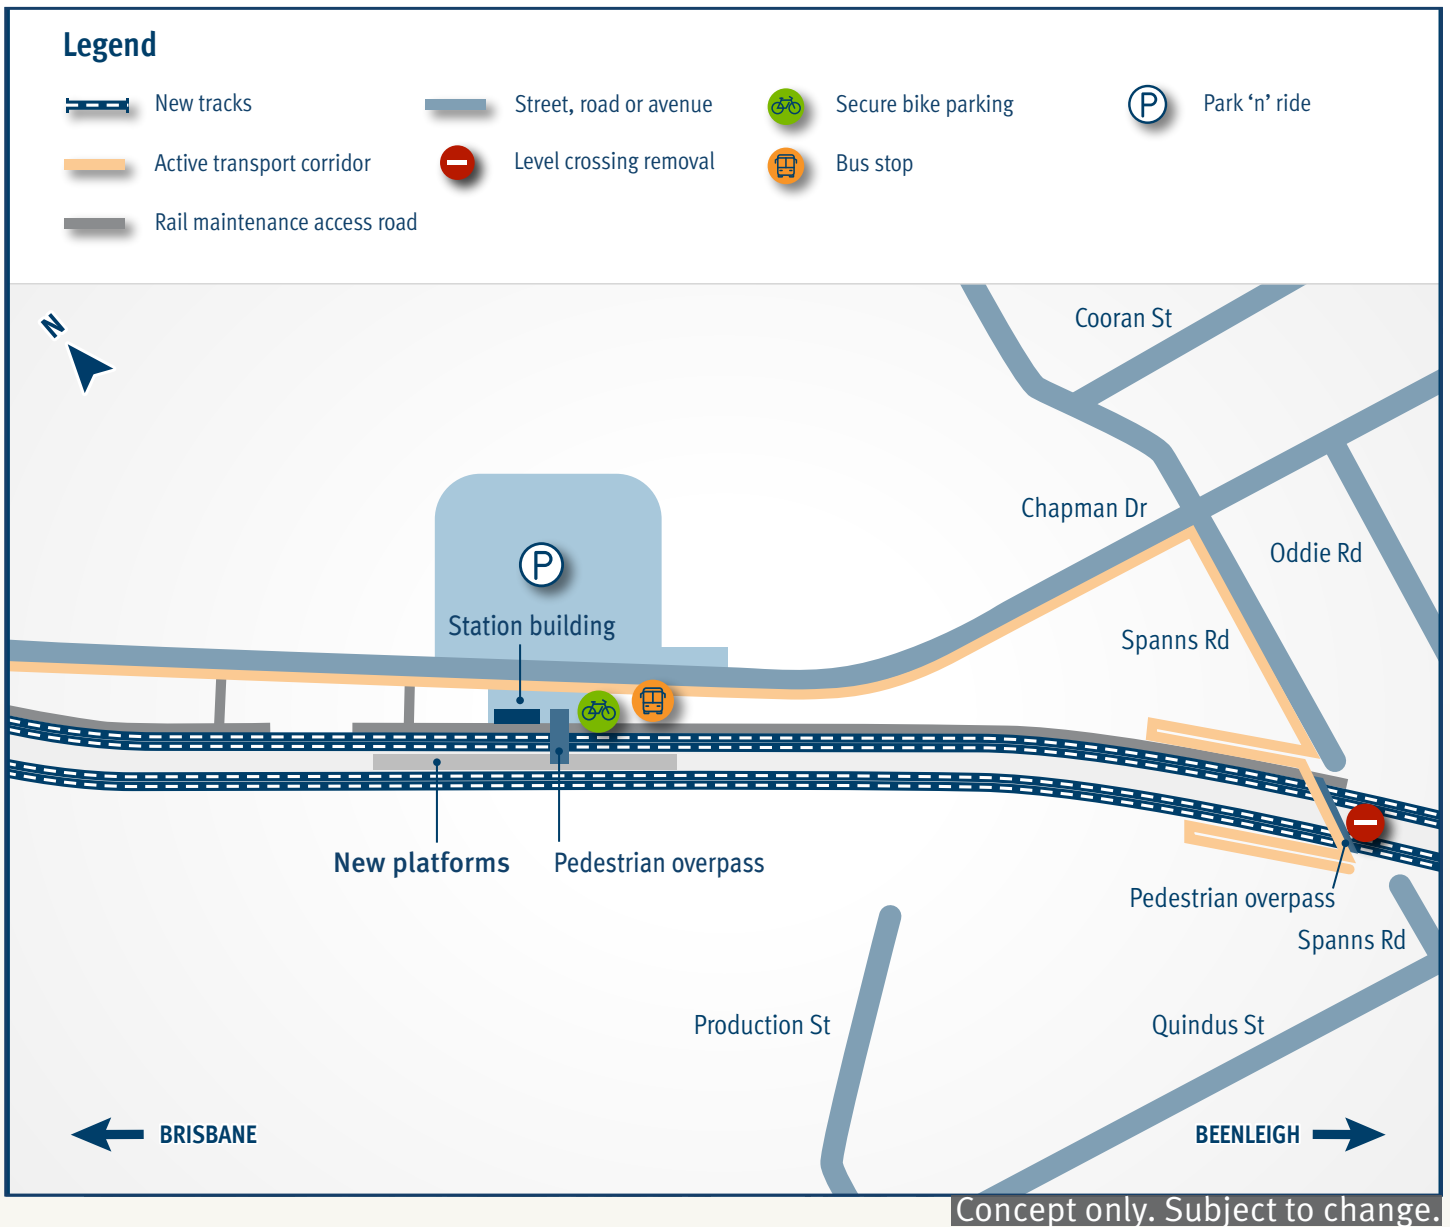

Have your say

Scan the QR code or visit the online engagement hub at tmr.qld.gov.au/logangoldcoastrail to have your say and find out about community drop-in sessions.
