

The Logan and Gold Coast Faster Rail project will double the number of tracks between Kuraby and Beenleigh and connect growing communities with more frequent and reliable train services.

Overview

November 2023

Kingston station is being upgraded to improve accessibility, safety and customer experience for the community. The new station will feature a range of improvements to make travel easier, including straightened and raised platforms, increased platform coverage, new lifts and improved park 'n' ride facilities.

The station will better integrate with the Kingston Butter Factory Precinct, an important historical community and cultural hub, with an improved entry and bus stops on Milky Way.

As part of this project, the existing Kingston Road road-over-rail bridge will also be upgraded to accommodate the wider rail corridor underneath.

This station upgrade will be designed and constructed in compliance with the *Disability Discrimination Act (1992)* to provide and improve accessibility for all users.

Have your say

Scan the QR code or visit the online engagement hub at **tmr.qld.gov.au/logangoldcoastrail** to have your say and find out about community drop-in sessions.
