

Legend

- Stage 4 Beerburum to Moodlu – possible corridor options
- Stage 1 Moodlu to Moorina – corridor protected
- Power easement
- State government roads
- Local government roads
- North Coast rail line
- 1 in 100 year flood area
- Elimbah PFGA

Indicative only - subject to change

Corridor options will be refined following community feedback and further technical investigations before a preferred alignment is identified. Interchange locations and land requirements are yet to be determined.

Option 1

Option 1 is west of the North Coast rail line and Elimbah township, crossing the rail line north of McDougall Road in the Beerburum State Forest.

The corridor option provides opportunities for a connection to the proposed Elimbah PFGA.

This option maintains local connectivity for residents and businesses by providing overpasses at Whittington, Markwell, Alcock, Old Gympie, Twin View, McDougall, and Beerburum roads.

Option 2

Option 2 crosses the North Coast rail line south of the Elimbah township and Six Mile Creek, and travels east of the rail line.

This alignment provides greater flexibility to facilitate connections to the proposed Elimbah PFGA.

The option maintains local connectivity by providing overpasses at Whittington, Markwell, Alcock, Old Gympie, Smiths (Elimbah), Beerburum and Bartholomew roads and Jacks Lane.

Possible interchange locations

Two interchanges will likely be needed between the D'Aguilar Highway and Steve Irwin Way. Preliminary investigations suggest one interchange would likely be needed north of Six Mile Creek, and another between Old Gympie Road and Beerburum Road. Investigations will continue into interchange locations and designs as the preferred alignment is identified.

Notes:

- Corridor options have a common alignment that follow a section of the power easement.
- The Elimbah Potential Future Growth Area (PFGA), identified in *The South East Queensland Regional Plan 2017* is proposed to transition into the Urban Footprint as a Major Development Area (MDA)*.
